Summary

A front-end developer with 4 years of experience in tech communities and startups. Proficient in Html, Css, Tailwind Css, Javascript, Typescript, React.js, Next.js, Dart and Flutter. Passionate about coding appealing interfaces.

Education

University of Ibadan

2019-2024

Bsc. Archaeology

Work Experience

ATC - AFRICA

Oyo State, Nigeria.

Frontend Web Developer

Oct 2023 - Present (Part -time)

Developed frontend architectures using Next.js and Tailwind CSS, achieving a commendable Lighthouse performance score across managed web projects.

Architected a data-fetching layer using TanStack Query, implementing a caching strategy that reduced server load by 40%.

Implemented robust testing using Jest and React Testing Library, thus achieving 80% code coverage & a significant reduction in production regressions.

Translated high-fidelity Figma designs into pixel-perfect, interactive websites

Streamlined production pipeline by creating reusable components, cutting frontend development time for new features by 25%.

SABO

Feb 2022 - Dec 2025 . Full-time

Frontend Web Developer

Architected the frontend of a web chatting application using react.js, tailwindcss and typescript

Engineered a custom USD-to-NGN currency conversion tool, implementing precise calculation logic to handle fluctuating real-time data.

Architected a data-rich dashboard with dynamic filtering and optimized rendering for large datasets.

Engineered a TDD workflow that ensured 90% code coverage for critical business logic.

Streamlined production pipeline by creating reusable components, cutting frontend development time for new features by 15%.

Implemented intricate design concepts provided by the UI/UX designer, ensuring a 1.2-second reduction in First Contentful Paint (FCP) for core pages.

JOJEGA - CONCEPT

Mobile App Developer(Flutter)

Implemented smooth in-app navigation using the Get-X package and managed app state via BLoC & Provider to improve scalability and performance.

Engineered high-performance, responsive UI components using Flutter widgets and Dart.

Streamlined production pipeline by creating reusable components, cutting development time for new features.

FMI Dashboard - FINNISH MARINE INTELLIGENCE

World's first, publicly available Web-Based,high-performance maritime tracking application, designed to provide real-time visibility into vessel movements across Finnish waters. By integrating live telemetric data, it transforms complex AIS (Automatic Identification System) streams into an intuitive, actionable interface for logistics monitoring. Core Features include: Real-Time AIS Mapping , Icebreaker Support & Tracking, Dynamic Data Synchronization, Individaaual Vessel Analytics and Logistics Insights

FINANCE_TRACKER

The application serves as a centralized hub for managing personal cash flow. It emphasizes "at-a-glance" awareness through a real-time budget tracking system. It allows you to track your income, expenses, savings, balance and set budget limits. By persisting data locally, it ensures that your financial records are accessible instantly, while the visual indicators provide immediate feedback on spending habits relative to your set monthly limits.
